I understand that many will pause and treat this post with derision upon reading the title. However, the more I read about Hydra, the more it seems that the team is trying to reach a compromise and make it work as opposed to working with the best scaling solution. I recently made a post referencing a comment thread/discussion between an ethereum zk-rollups supporter and the cardano community .

Many people compare HitBTC to Binance since both exchanges are crypto only and are relatively lenient regarding the coins they list and who they accept as a customer. When you compare both exchanges, it seems that Binance has lower fees (0.1% flat) and a better reputation, while HitBTC has a better user interface and a wider selection of features.
