What are the fees on Coinbase Pro? Trading Fees. Coinbase Pro uses a maker-taker fee model for determining its trading fees. Orders that provide liquidity (maker orders) are charged different fees than orders that take liquidity (taker orders). Fees are calculated based on the current pricing tier you are in when the order is placed, and not on the tier you would be in after a trade is completed. Your fee tier is recalculated hourly based on your total trading volume.

Assemble Protocol achieves a low risk analysis based on InvestorsObserver research. The proprietary system gauges how much a token can be manipulated by analyzing much money it took to shift its price over the last 24 hour period along with analysis of recent changes in volume and market cap. The gauge is between 0 and 100 with lower scores equating to higher risk while higher values represent lower risk.
