Kin: Money for the Digital World - Kin.org

KIN has one major advantage over all other cryptocurrency projects: its parent company KIK has a huge active user group already in place, which is a huge plus for the coin in terms of usage. There are several social media blockchain startups, but none of them have large user bases, or even a working product at this time.

Kin is built, grown, and governed by us, the developers who make up the ecosystem. We are a diverse group ranging from small startups to billion dollar apps. We have the scars of building for platforms that change their minds, and we have resisted the temptation to turn our users into the product. We built Kin to change the game.

Their token, \$CUMMIES, is used to power payments on their adult content platform. By using crypto, CumRocket enables creators to overcome some of the most prominent issues within the industry including chargebacks, payment processor restrictions, discrimination, blocked payments and more.

Prezzo BarnBridge - crypto.com

The Ravencoin blockchain requires miners to solve computational puzzles that most hardware is capable of solving. The blockchain ensures that the puzzles don't increase too fast, or that it eliminates possible miners from the process. Developing a special mining algorithm isn't new, and it encourages decentralization.
