What are the fees on Coinbase Pro? Trading Fees. Coinbase Pro uses a maker-taker fee model for determining its trading fees. Orders that provide liquidity (maker orders) are charged different fees than orders that take liquidity (taker orders). Fees are calculated based on the current pricing tier you are in when the order is placed, and not on the tier you would be in after a trade is completed. Your fee tier is recalculated hourly based on your total trading volume.

This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.
