The main goal of the Akropolis project is to create a decentralized ecosystem where developers can build protocols for a wide range of financial use cases, including asset management. Akropolis helps users manage their assets to grow cryptocurrency holdings with the use of dApps hosted on the network and managed by DAOs that represent developers.

3 weeks after the project sells out, the Honey Bee Club team will launch their 2nd NFT collection, called the Queen Bee Club. Holders of 3 or more bees will receive a burnable token airdropped to their crypto wallet. They will be able to burn that token in exchange for 1 free Queen Bee NFT from their 2nd collection.

Mining is the lifeline of the crypto world. It validates ongoing transactions and mints new coins into circulation. In straightforward terms, a miner solves some complex Math problems to verify the transactions. It is the process by which a miner trades his computing power and electricity for the block reward.

*(end of excerpt)*
