The crypto bot can accomplish this by either: 1. Sending trade signals to the user 2. Executing buy or sell orders automatically. In the first instance, users would be notified the moment certain market conditions are met, at which time they could execute a trade manually. This might be a simpler version of a bitcoin trading bot.

Crypto arbitrage is a form of trading that involves simultaneously buying and selling cryptocurrencies from different exchanges. Arbitrage traders make profit from crypto price differences between exchanges. This involves buying assets for the lowest price available and selling for the highest. The process of arbitrage trading usually gives relatively small returns on each trade. Also, traders must place their orders extremely fast in order to have advantage among other players.
