How Many Biconomy (BICO) Coins Are There in Circulation? BICO is the networks native utility token with a total supply of 1 billion. Node operators on the network pay a transaction fee in BICO to add information to the blockchain. Token holders can earn rewards from staking and securing the network. BICO is also used to vote on governance proposals, such as changing the code, adding additional services, or use of treasury funds. Because the fee was a cost of acquiring the Bitcoin, you add it to your basis which becomes, in fact, \$2,030. That means your gain is actually only \$7,970.00. You can also deduct the cost of any fees associated with selling your Bitcoin so if it cost you another \$30 to sell it, then you would report that as a deductible fee against the gain and reduce the capital gain to \$7,940.00.
