Crypto.com is the best place to buy, sell, and pay with crypto. Crypto.com serves over 10 million customers today, with the worlds fastest growing crypto app, along with the Crypto.com Visa Card the worlds most widely available crypto card, the Crypto.com Exchange and Crypto.com DeFi Wallet.

Crypto is not the stock market, and deviating away from trusted projects or trying to rely on technical analysis is very risky. TLDR: Unfortunately a lot of the newbies that are joining Crypto are completely ignoring even top 100 coins and are choosing to put their money in these shady "get rich quick" schemes which is nothing short of gambling.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).
