Coinbase has a paper wallet capability. Very easy to use. Just move all or some of your bitcoins to the paper wallet (public key) and you can get them back using the private key. You can move any number of bitcoins from any source to the public key, and then get them back to your coinbase account using the private key. Easypeasy.

API stands for Application Programming Interface. As the name already suggests, it is an interface used to link the ProfitBird platform with the exchanges. If you provide your ProfitBird account with the API Key and Secret of your Coinbase Pro account, then the ProfitBird Platform is able to invest and trade on your exchange account on your behalf. So the API Key and Secret act as a unique identifier for authentication.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

The good thing about crypto trading is that you are not required to maintain a required minimum amount of deposit in your wallet. The transaction fee, more often than not, is deducted as a percentage of the amount of your initial capital. This is why you do not have to be bothered by the investment money required in crypto trading.
