How Many Biconomy (BICO) Coins Are There in Circulation? BICO is the networks native utility token with a total supply of 1 billion. Node operators on the network pay a transaction fee in BICO to add information to the blockchain. Token holders can earn rewards from staking and securing the network. BICO is also used to vote on governance proposals, such as changing the code, adding additional services, or use of treasury funds. Opposed to a custodial exchange that requires control of your funds, a non-custodial exchange allows you to trade without handing over your funds to a third-party and the ability to maintain control over your private keys. If you are the only person with access to your private keys, only you can choose what happens with your funds, and this is one of the reasons non-custodial exchanges can be extremely secure to use.
