KIN has one major advantage over all other cryptocurrency projects: its parent company KIK has a huge active user group already in place, which is a huge plus for the coin in terms of usage. There are several social media blockchain startups, but none of them have large user bases, or even a working product at this time.

Coinbase is a secure online platform for buying, selling, transferring, and storing digital currency.

In crypto futures trading, the buyer or seller must buy or sell the underlying cryptocurrency at the set price regardless of the assets current spot price at the contracts expiring date. Futures contracts specify the quantity of the underlying asset and are standardized to make futures trading easier.

A key benefit of futures trading is that you can hedge existing spot positions without additional crypto - allowing you to be agile and prepared for any market environment. Cryptocurrency futures allow you to maximize your returns by utilizing the power of leverage to multiply your profits and apply advanced trading strategies.
