Globex360 is a regulated trading broker that has a limited range of instruments for trading online via the popular MetaTrader 4 (MT4) platform for desktop, web and mobile devices. The trading brokers review team found this broker not the cheapest option whilst they could improve on the educational resources provided.

On Sunday I sent some Sol to my Phantom address from Coinbase Pro (not much little over 1). I got the confirmation from Coinbase that it was sent. I logged on to my Phantom wallet to see if it was in there and it wasn't. Now Tuesday and I still haven't received it, I sent a support ticket to Coinbase and Phantom to try and figure out what is .

From my own experience, sometimes it takes up to 48 hrs to transfer sol between cb/cb pro to phantom. I was able to move sol from CBPro to exodus in less than two minutes! CB pro is sometimes a little flaky and laggy. I sent some ETH earlier today and it took like 10 min. But 2 hours seems like an abnormally long time.

Original language: Starting Today Thursday May 20, transfer SOL into your Coinbase Pro account ahead of trading. Support for SOL will generally be available in Coinbases supported jurisdictions. Trading will begin on or after 9AM Pacific Time (PT) Monday May 24, if liquidity conditions are met.
