Options trading is the trading of instruments that give you the right to buy or sell a specific security on a specific date at a specific price. An option is a contract that's linked to an underlying asset, e.g., a stock or another security.

Binance is a crypto-to-crypto exchange. This means that users can only use it to trade cryptocurrencies. If you don't already own some cryptocurrency, then you'll need to buy some before you can start trading with Binance. I suggest using an exchange that offers fiat currency trading like Coinmama, CEX.IO or Coinbase.
