

I am currently working on a small app using the API of Coinbase. Coinbase needed CB-ACCESS-SIGN header to authenticate. The CB-ACCESS-SIGN header is generated by creating a sha256 HMAC using the secret key on the prehash string timestamp + method + requestPath + body (where + represents string concatenation).

Getting low transaction fee on Binance is easy, but kind of tricky somehow. Binance is one of the best exchange platforms with lowest fees among other exchanges in the market. It allows close to 0.1% trading fee for users with a monthly trading volume less than 50 BTC, and much more less for those trading higher than that volume. I myself have been using Binance for trading for over some years now, and I cant remember noticing the amount of crypto coins am paying as fee paid yet, some .

Copy trading is the trading methodology whereby investors across financial markets can automatically open positions and execute trades in accordance with the portfolio of another selected entity or individual in the market. It can either be automatic or manual depending on how the individual would like to approach copy trading.

Copy trading is a sub-category of social trading however the services offered by social trading and copy trading networks differ in several key aspects. Social trading is a general classification of a type of trading technique, whereas copy trading refers to those platforms that allow traders to automatically copy the trading signals of other investors and create a portfolio of traders.
