Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

1.1 Sign into your Coinbase Pro account and click on your username, then click on API 1.2 Make sure you are on the API Setting tab, then click on New API Key 1.3 Tick the View box under permissions and then save the Passphrase. You will need to use that later when linking your Crypto Pro App. Click on Create Key Step 2: Save Your Keys

ICO stands for an Initial Coin Offering. It is also regarded as an alternative form of crowdfunding for releasing a new crypto unit. Startups use ICOs as a means to raise development funds. They have been used to raise millions of dollars for blockchain-related projects. ICO is one of the easiest and most effective ways to attract investments.
