Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

For ICOs, investors buy new cryptocurrencies with the intention of making a profit when the value increases. This is similar to an individual who earns a profit when the stock they buy on the stock exchange goes up.

Volume is what makes exchanges money. They collect transaction fees on trades through their platform typically a percentage of the total value traded. Without a certain volume threshold, exchanges will ultimately fail to be profitable business ventures. For you, as a cryptocurrency investor, exchange volume is equally important.
