The HYDRA Token The HYDRA token was released just after 2021 began, at a price of \$1.69 and in its first few weeks remained in a range of roughly \$1.50 to \$2.00. By February 2021 the price began to climb and at the end of February HYDRA tokens were trading above \$8.

I understand that many will pause and treat this post with derision upon reading the title. However, the more I read about Hydra, the more it seems that the team is trying to reach a compromise and make it work as opposed to working with the best scaling solution. I recently made a post referencing a comment
