I went through FTX Exchange to do a SEPA withdrawal, worked fine, though they don't have instant transfer like binance so expect it to take 2-3 days to clear into your account. Have to complete KYC, of course. To move your funds they support BUSD in bep2 version so thats a cheap way to withdraw from binance and deposit into FTX. Recommend!

Binance recently launched a futures trading platform Binance Futures that allows traders to use leverage and to open both short and long positions. After our first look and test positions, we can say that the platform is very similar to that of Binances spot exchange, which makes the transition very easy.

Binance Futures is the leading cryptocurrency futures trading platform with leverage up to x125. It allows you to open Long positions (upward bets) and Short positions (downward bets). Allowing very rapid gains but also equally rapid losses, Binance Futures leverage should be used sparingly and knowing the risk of liquidation of your position.
