Cryptocurrency was invented so internet payments could be be as anonymous and private as physical cash.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

If you are going to cash it out asap, you can mine to coinbase. If you plan to hold on to it, mine it to a paper wallet or where ever you are going to store it.
