Firstly, there are one major difference between day trading cryptocurrency and day trading real-world assets. The reason for this is volatility. Volatility is when the price of an asset moves up or down really quickly, meaning it can either be a great success for the trader or alternatively a great failure.

Day trading the cryptocurrency market can be a very lucrative business because of the high volatility. Since the crypto market is a relatively new asset class, it has led to significant price swings. Before day trading Bitcoin or any other altcoins, its prudent to wait until we have a high reading of volatility.

To get the best insights into Bitcoin, and the cryptocurrency market in general, its best to use Twitter. Many of the most influential figures in the crypto game are heavy users of this social media platform, and they will willingly share their opinions.
