To put it simply, Venus is a De-Fi protocol built on the Binance Smart Chain Network that allows its users to borrow, lend, earn cryptocurrency, mint stable coins, and much more, and that too at much lower transaction fees as compared to other De-Fi protocols that offer the same functionality but build on the Ethereum Network.

The opportunity to become the dominant social network, social media blockchain rather, is so huge that there are many others vying for that crown. The safest strategy of all would be to get a small allocation to a few different social media blockchains so that you've a higher chance of having a position in whichever one or group of networks wins out.
