They suggested I mortgaged my house, borrowed from my family or used my credit card.

While ERC20 tokens are based on the Ethereum blockchain, BEP20 tokens are built on BSC, and TRC20 tokens are based on the TRON blockchain. All three networks use the same solidity language, which means they are mostly cross-compatible and can be used interchangeably, with tokens developed on one platform accessible on others.

Both ERC20 and TRC20 are smart-contract tokenization standards that offer the ability for the user to create a token for themselves, and these tokenization standards differ mainly on which cryptocurrency network they're on, where ERC20 is on the Ethereum blockchain, and TRC20 is on the Tron blockchain. There are other differences well discuss, but that is the biggest difference.
