An automated market maker is a type of decentralized exchange. The fundamental difference is that AMMs use a mathematical formula to calculate the rate, and not an order book (ask and bid orders), as on a traditional crypto exchange.

Automated market makers (AMMs) are part of the decentralized finance (DeFi) ecosystem. They allow digital assets to be traded in a permissionless and automatic way by using liquidity pools rather than a traditional market of buyers and sellers. AMM users supply liquidity pools with crypto tokens, whose prices are determined by a constant mathematical formula.
