HitBTC Review HitBTC is an exchange for the experienced cryptocurrency trader interested in trading altcoins. The exchange offers high liquidity and does not force KYC measures on its users (though it is recommended to verify your account to avoid potential issues.

IMO, kraken is the best exchange. It's the mix of many factors: They don't have as many altcoins as Binance but still many, they offer staking for some coins (although not many and not the best rates), they are a registered company in a country with a solid legal system and with real offices and known people (unfortunately that means you need to do their terrible KYC process), you can buy .

Unlike other apps, eToro allows you to easily create a diversified crypto portfolio with no hidden costs. eToro

is one of the few fully regulated crypto service providers, trusted by millions of users worldwide. Buy bitcoin, ethereum, XRP, and other top cryptocurrencies without deposit fees. Seamlessly deposit and withdraw to and from your bank .

In case of any issues please contact Simplex support. Once payment is completed, you can check your payment status on Simplex. The crypto amount quoted is based on the current rate and is not final. If the rate changes by more than +/-2.5% you will be asked to reconfirm the transaction via email from Simplex.
