OKCoin Review 2021: Pros, Cons & Ratings - Trading Brokers

Automated market makers (AMMs) are a mechanism used by most decentralized exchanges to facilitate permissionless trading. AMMs make use of liquidity pools containing 2 or more assets, and prices are derived

based on the proportion of each asset in that pool as well as the mathematical function used. Orders through an AMM are executed automatically via a smart contract that will calculate the trade prices algorithmically, including any slippage from the trade execution.

ATRI is a token used to pay for products and services within the Atari online entertainment ecosystem, which includes video games, gambling, and betting platforms. Atari Chain aims to make ATRI easy to integrate directly into other developers games as a form of payment. ATRI is the ERC-20 utility token, built on the Ethereum blockchain.
