Coinbase is good, but it's pretty expensive. They have a lot of services though. One good thing is that some of these exchanges that only list a few coins help us determine the ones that are useful and might hold some fairly stable value. I used to use Coinbase a lot, now Binance.us is my main onramp.

Any movement of funds needs to be confirmed via 2 we-mails and a cellphone code, making it virtually impossible to get hacked. AT the same time Coinbase is a US-based company that's insured, making an MTGox situation nearly impossible as well. If you don't mind the government having your information then Coinbase is great.
