Coinbase is good, but it's pretty expensive. They have a lot of services though. One good thing is that some of these exchanges that only list a few coins help us determine the ones that are useful and might hold some fairly stable value. I used to use Coinbase a lot, now Binance.us is my main onramp.

LONG-SHORT RATIO. Great for BTC and crypto environment. Absolute values of long and short positions can be misleading as since time passes new market participants join the crypto space. Also, Long tend to be long time holders, while shorters tend to be short time shorter. It is the ratio of the two levels (no matter what they are) that is a better indicator than the two of them taken separately.
