TradingView is not a broker but rather a charting platform showing you the world wide access to market data

under the form of charts. I must say it is one of the best and most seamless charting platform I have ever seen. You can also make an account there and customize the chart to apply your method of analysis.

The character of crypto assets is wavy, which means that there is a strong chance that AKRO can get to near to an all-time value once again in the future. You can use this Akropolis review to check if it is worth it to invest in this cryptocurrency and how trusted or risky this investment could be.

This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.
