I used to use Coinbase a lot, now Binance.us is my main onramp.

The Coinbase Card is a debit card backed by Visa. This means you can use your Coinbase Debit Card with any Visa-compatible payment terminal, ATM, and online checkout solution. That said, this is where the fun comes in.

Any movement of funds needs to be confirmed via 2 wemails and a ceelphone code, making it virtually impossible to get hacked. AT the same time Coinbase is a US-based company that's insured, making an MTGox situation nearly impossible as well. If you don't mind the government having your information then Coinbase is great.
