With many countries regulators requiring a KYC (know your customer) or AML (anti-money laundering) verification process to have regulated exchanges, the privacy many people value with Bitcoin, Monero and other Altcoins is always going to be difficult to protect.

Sure, there are no issues in mining directly to your coinbase wallet address. However it is not recommended. Its not that coinbase dont recommend sending mining payouts to coinbase wallet. But because it is unreliable. At times due to heavy trading activities coinbase server goes offline and during such time your mining payouts may get lost.

Iv done it. Linked my Coinbase to Ethermine and have safely mined to it. Coinbase says not to do it because small transactions can overload their network but I dont think its much of a problem if your not getting 30 payouts a day. They do change addresses but every address is linked back to your account so it doesnt matter if it changes.
