Futures contracts on Binance are intuitively designed and easy to use, making them ideal for beginners. A key benefit of futures contracts, particularly the USD-margined contracts, is that you can easily calculate their returns in fiat. For example, when you make 500 USDT in profit, you can easily estimate that the profit is worth approximately \$500 - since the value of 1 USDT is pegged closely to 1 USD.

Notably, Coinbase Pro is only accepting the ERC-20 version of IOTX, and not mainnet IOTX. Users shouldnt be sending their native IOTX to the exchange, as the coins will be lost. IOTX plays a number of roles on the IoTeX blockchain, and is used to facilitate transactions (gas fees), staking, governance, and registering new devices on the network.

This is the coin you can use on the IOTX network for staking and transactions. Coinbase/pro list the erc20 version of the coin (old version). If you plan on transferring to iopay or using within IOTX network, you will have to pay fees to swap erc20 into native because erc20 does not work on the IOTX network.

Add 1 to this value to be 7497 on the second account so each account has a unique port value. In your NinjaTrader connection for this account, match the port with what you specify in TWS for each account connection. Connect in NT using File > Connect, you will do this twice for both account connections.
