When buying cryptocurrencies through an exchange like Binance or Robinhood, customers aren't actually in possession of these keys, let alone a cryptographic wallet. In other words, exchanges may make the process of buying, owning, and trading cryptocurrencies easier perhaps the biggest reason for their continued success but they don't.

Having talked about one of the ways of building a cryptocurrency exchange, lets now focus on what are the main steps involved while building a good cryptocurrency exchange like that of Binance. First things first give utmost importance to the design creation. This basically involves two steps wireframes, where the key features are implemented, and a prototype which is nothing but a detailed visualization of the users interaction with the application that allows preventing .
