A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

API stands for Application Programming Interface. As the name already suggests, it is an interface used to link the ProfitBird platform with the exchanges. If you provide your ProfitBird account with the API Key and Secret of your Coinbase Pro account, then the ProfitBird Platform is able to invest and trade on your exchange account on your behalf. So the API Key and Secret act as a unique identifier for authentication.

A security key is a physical hardware authentication device designed to authenticate access through one-time-password generation. Coinbase supports Universal Second Factor (U2F) security keys. Supported security keys are available from a variety of vendors. Coinbase recommends buying a key that works best for your device and preferences.

Here's how you can lend your crypto. All set to start lending your crypto to add an extra stream of revenue and grow your assets? You can do that in multiple ways. But choosing the way that best fits your needs will make your life easier. Decentralized protocols such as Compound or Aave will lend your crypto for a set interest rate. Once there, you can transfer the crypto you want to lend and wait for it to generate interest for you.
