Coinbase has been hit-and-miss for me for the past month. For example I've had: 1 "instant transfer/buy" that took 23 hours for the coins to arrive. The next day, before my original purchase arrived I needed to make a small additional order to compensate for a rate drop and that one went through right away.

For US customers, Coinbase uses the traditional ACH bank transfer system to collect money from your bank. The ACH bank transfer system is not built for speed this is why the digital currency takes 4-5 business days to reach your wallet after initiating the purchase.

Last transfer took 7 days. My current transfer is estimated at 9 days. You can instant buy using a credit card and paying the fee. Depends on how urgent you need to get into the market. Coinbase is just slammed lately. And remember only add Money to your USD wallet and transfer to GDAX to avoid the large fees. Dec 31, 2017 0.
