API stands for Application Programming Interface. As the name already suggests, it is an interface used to link the ProfitBird platform with the exchanges. If you provide your ProfitBird account with the API Key and Secret of your Coinbase Pro account, then the ProfitBird Platform is able to invest and trade on your exchange account on your behalf. So the API Key and Secret act as a unique identifier for authentication.

Each cryptocurrency has its network with a set of nodes communicating with each other to verify blocks. Bitcoin, for instance, has a bitcoin network and a set of nodes that communicate with each other randomly. Each node has the authority to verify and validate all Bitcoin transactions and validate every block.

Such nodes require extraordinary amounts of storage and memory. It often takes hours to join and sync to the network with a full node. Running a full node with cloud services will likely require you to pay a monthly service fee. Compare this with using a light node. These take up less space and can be small enough to run on mobile devices.

An API Key can be considered as a username. This is generated by the exchange once you declare your settings. An API Secret or API Private Key is simply another string of characters that must be used in combination with the API Key to establish the connection. An additional security layer can be added by generating an API Passphrase. While the API Key and Secret are generated by the exchange, the Passphrase is commonly generated by the user.
