The main difference between MT4 vs MT5 for this point of comparison is that MT4 has fewer technical indicators built in to the platform. However, it has a larger library of third party plug-ins than MT5 does. This is probably because MT4 has been around for longer and still has a larger community of traders using it.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).
