Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

One can also compare it with market cap to locate the current stage of the cryptocurrency market cycle. Total value locked (TVL), in the context of cryptocurrency, represents the sum of all assets.
