Coinbase is the largest cryptocurrency exchange in the USA, and it offers more than 70+ cryptocurrencies to its 68 million users. The features that make Coinbase such a popular exchange are its user-friendly platform, simple registration, various deposit methods, and crime insurance cover against cybersecurity breaches.

Binance is a crypto-to-crypto exchange. This means that users can only use it to trade cryptocurrencies. If you don't already own some cryptocurrency, then you'll need to buy some before you can start trading with Binance. I suggest using an exchange that offers fiat currency trading like Coinmama, CEX.IO or Coinbase.
