Best for Beginners. Coinbase has been serving the cryptocurrency world for nearly a decade and with their incredible experience, they only continue to grow. This growth has led Coinbase to be one of the largest crypto brokers in the world. This leads to secure trading options you can trust.

While MetaMask and the Coinbase wallet are hot wallets designed to always be online, they feature integrations to safer storage alternatives. Apart from keeping your seed phrase safe, you can link your MetaMask wallet to hardware wallets such as Ledger Nano to enjoy the security of offline storage.

MetaMask is Ethereum based. (No Bitcoin) There is no connection other than a transfer transaction which is mainly a blockchain database update. All wallets have a send/receive button. Please sign in and read from top to bottom each wallet. You have to train yourself how to use each in your own time. 2.5K views Manasseh Mathias
