Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

An initial coin offering (ICO) is a new crowdfunding approach used by blockchain companies. Companies usually create their own virtual currencies or tokens and sell them to the public to raise money to implement their blockchain.
