How Crypto Arbitrage Works. To make different exchanges via this method, you must first pay attention to crypto values on various platforms. When you see that a value is higher on one platform than the other, its time to make your move. In quick succession, you'll buy the lower price crypto, then sell it at the higher price on the other .

Cryptocurrency arbitrage is a strategy in which investors buy a cryptocurrency on one exchange and then

quickly sell it on another exchange for a higher price. Cryptocurrencies like Bitcoin trade on hundreds of different exchanges, and sometimes, the price of a coin or token may differ on one exchange versus another.
