TradingView is not a broker but rather a charting platform showing you the world wide access to market data under the form of charts. I must say it is one of the best and most seamless charting platform I have ever seen. You can also make an account there and customize the chart to apply your method of analysis.

Controlling shares of the token have been burned meaning that no one can retrieve the initial liquidity provided to PancakeSwap to enable trading, and no one can make any alterations to the smart contract. That makes Saturna unuggable as there is no mint function to change the supply or alter the current tokenomics.
