The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.

Cryptocurrency arbitrage allows you to take advantage of those price differences, buying a crypto on one exchange where the price is low and then immediately selling it on another exchange where the price is high. However, there are several important risks and pitfalls you need to be aware of before you start trading. Learn more Compare exchanges

Arbitrage is the concept of buying and selling cryptocurrency simultaneously but on different markets. This is because of the potential profit possible due to the price difference between the markets. This is not some revolutionary new concept, but a very old one which is used in all markets.
