A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

Coinbase is a hosted wallet service, which means we manage your private keys for you, securing your funds with a password, device confirmation and 2-factor authentication . We take security very seriously at Coinbase and utilize our secure cold-storage technology to protect our customer's funds.

Bitcoin for instance is up 104% for the year even though its 30% down from all-time highs. Even a bear market at the end of 2021 is not enough to wipe out these incredible gains. Crypto, including altcoins, still remain growth assets for 2022. So, with these facts, it makes sense that investors would want to get exposure to crypto before 2021.

Coinbase lied to me when saying they got request from me but they could not to prove it so far. For your information: if someone is stealing your money, he will never send any request because to get approval he must verify his location, 2FA phone, send a link for a LinkedIn account, send a Bank Statement and it takes about 2-4 days. I asked Coinbase send me all verifications for that request, but they could not provide me with any.
