The Grin blockchain has no addresses and doesn't store data about the amounts transferred. On the Grin network, a new block is generated every 60 seconds, and each has a grin mining reward of 60 grins. The network is set to generate 1 grin per second forever. This creates an increase in supply and a decrease in the inflation rate.

Step 1: With your Grin Node and Wallet running, enter the following command in your wallets terminal: grin wallet send -m file -d any_transaction_name.tx 0.1. A file with the name any_transaction_name.tx should be generated and you can then send it to your recipient.
